### Book Summary

G.A. Freiman's book is a deep look at important current events surrounding America as well as detailed predictions for the outcome of each event. Freiman has separated his work into seven sections that encompass the dire issues of our time: 1) Terrorism 2) World Politics 3) US Politics 4) US Social Issues 5) Personal Issues 6) American Culture and 7) God. Each of these seven chapters cover multiple issues that will decide what direction America chooses to take over the next generation and ultimately if success will continue to follow the United States. Freiman believes that America is in favor with our creator as a reward for America's proliferation of freedom that streams from our governmental structure and religious values. Freiman not only predicts America's conservative future but he makes clear what things every American can promote to ensure America remains the leader of the free world.

### Author Profile

G.A. Freiman is a very successful businessman who has a deep passion and love for the United States of America. Mr. Freiman was brought up modestly in the southern United States and has a belief that America is among the chosen people in our world. Raised Roman Catholic yet from a broken home, G.A. Freiman had an interesting path to his faith. Discovering an uncanny ability as a young boy that allowed him to accurately predict future events also greatly complicated this young man's course to God. G.A. Freiman now in middle age has utilized his abilities to predict many important future events while explaining America's favor with our creator.
